

Controtelaio per pareti interne rifinite ad intonaco

Controtelaio per pareti interne rifinite ad intonaco, capace di alloggiare due porte scorrevoli, una posta a destra e l'altra a sinistra del vano di apertura della porta. È adatto quando si vogliono separare ambienti adiacenti, come ad esempio la sala da pranzo dal soggiorno, attraverso un'unica apertura di dimensioni più ampie. Così due ambienti comunicanti possono, all'occorrenza, trasformarsi in un unico grande ambiente.
